Ordering and subscription information

This product, catalogue no. 62-011-XIE, is published monthly in electronic format at a price of CAN\$19.00 per issue and CAN\$175.00 for a one-year subscription. To obtain a single issue or to subscribe, visit our website at www.statcan.ca, and select Our Products and Services.

This product is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription. The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered

- by phone (Canada and United States) 1 800 267-6677
- by fax (Canada and United States) 1 877 287-4369
- by e-mail infostats@statcan.ca
- by mail Statistics Canada
Dissemination Division
Circulation Management, 120 Parkdale Avenue
Ottawa, ON K1A 0T6
- In person at the Statistics Canada Regional Centre nearest you, or from authorised agents and bookstores.

When notifying us of a change in your address, please provide both old and new addresses.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^p preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Explanation of Methods Used and Additional Sources for Industrial Price Indexes	61

Highlights

Monthly prices for manufactured goods at the factory gate rose in January for the second month in a row. Raw material prices also increased as a result of higher prices for crude oil.

Prices for manufactured goods increase again

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), rose 0.5%. Higher prices for petroleum products, primary metals, pulp and paper products, and lumber products were the main sources of the monthly increase.

The 12-month change in the IPPI was 3.2%, down from December's increase of 3.6%. The rate of growth has been decelerating since October 2004.

The Raw Materials Price Index (RMPI) was up 4.5% from December to January, following a 4.6% decrease registered the month before. There were price increases in mineral fuels, animals and animal products, non-ferrous metals as well as non-metallic minerals.

Compared with January 2004, raw materials cost factories 12.6% more. This was up from the 12-month rise of 11.1% in December but down from the peak of 28.2% last October.

In January, the IPPI (1997=100) stood at 108.8, up from its revised level of 108.3 in December. The RMPI (1997=100) reached 131.5, up from a revised level of 125.8 in December.

IPPI: Monthly increase due to petroleum products, primary metals, pulp and paper products and lumber products

On a month-over-month basis, manufacturers' prices rose 0.5% following an increase of 0.2% in December.

Petroleum and coal products prices increased 2.4% compared with December as gasoline and fuel oil prices rose 4.3%. Prices for primary metals increased 1.2%, mainly because of lower inventories for nickel products. Prices for pulp and paper products rose 1.3% in response to higher prices for newsprint paper and pulp. Lumber and other wood products were up 1.1% due to increased demand.

Motor vehicles and other transport equipment, meat, fish and dairy products, rubber, leather and plastic products, electrical and communication products, as well as machinery and equipment also contributed to the increase in January.

Lower prices were observed for chemical products (-0.6%), fruit, vegetable and feed products (-0.3%) and tobacco products (-0.2%).

IPPI: Petroleum and primary metals remain the major factors in the 12-month change

On a 12-month basis, the IPPI was up 3.2% in January. Prices for petroleum and coal products continued to have a major influence on the 12-month change, rising 18.0% from January 2004. If petroleum and coal product prices had been excluded, the IPPI would have increased only 2.1%, rather than 3.2%.

Prices for primary metal products also had a big impact on the increase, rising 14.3% from a year ago. Primary steel, copper and aluminum products were the major contributors to the advance.

Metal fabricated products increased 10.9%, as the cost for raw material remained high. Chemical products, pulp and paper products, rubber, leather and plastic fabricated products, as well as lumber and other wood products, also contributed to the 12-month increase in the IPPI.

These increases were partly offset by lower prices for motor vehicles and other transport equipment, which were down 3.8% from a year ago. Price decreases were also observed for fruit, vegetable and feed products and electrical and communication products.

RMPI: Crude oil prices push up the cost of raw materials in January

On a monthly basis, raw materials prices rose 4.5% in January. Mineral fuels were up compared with December, as crude oil prices increased 10.9% following two months of decline. The increase was the result of higher demand and colder temperatures.

Raw materials prices increasing

Animals and animal products increased 1.8% as higher prices were observed for cattle for slaughter (+3.0%), hogs for slaughter (+4.3%) as well as fish (+4.5%). Prices for non-ferrous metals were up 0.6% from December mainly due to higher prices for zinc and nickel concentrates. Prices for non-metallic mineral products also rose 2.1% from December.

Ferrous materials decreased 0.8% from December as iron and steel scrap prices were down 1.4%. Prices for wood products decreased 0.5% due to lower prices for pulpwood.

On a 12-month basis, the price of raw materials rose 12.6% in January, up from the 11.1% advance in December. Mineral fuels were up 23.4% with crude oil prices rising 31.5%. If mineral fuels had been excluded, the RMPI would have increased only 3.7% instead of 12.6%.

Prices manufacturers paid for non-ferrous metals rose 13.0%, mainly because of higher prices for radio-active concentrates, copper, zinc, and lead. Animal and animal products prices rose 9.1% from January 2004 as higher prices were registered for hogs for slaughter, cattle for slaughter and unprocessed whole milk.

Other major contributors to the 12-month increase were higher prices for ferrous materials as well as non-metallic minerals.

These increases were partly offset by lower prices for vegetable products and wood products.

Impact of the exchange rate

Between December and January, the value of the Canadian dollar fell 0.5% against the US dollar.

As a result, if the impact of the exchange rate had been excluded, the IPPI would have risen 0.3%, compared to the actual 0.5% increase.

On a 12-month basis, the value of the Canadian dollar rose 5.8% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 4.8% between January 2004 and January 2005, rather than their actual 3.2% increase.

Prices for intermediate goods continue to increase

Prices for intermediate goods increased 0.5% from December. Higher prices for primary metals; petroleum products; pulp and paper products; lumber products; rubber, leather and plastic products; and motor vehicles were the major contributors to the increase.

Lower prices for chemical products, tobacco products and fruit, vegetable and feed products partially offset the monthly increase.

Producers of intermediate goods received 5.7% more for their goods in January 2005 than in January 2004, down from the 6.7% increase in December. Higher prices for primary metal products; petroleum products; metal fabricated products; chemical products; pulp and paper products; rubber, leather and plastic products; and lumber products were mainly responsible for the annual increase.

These increases were partly offset by declining prices for fruit, vegetable and feed products; motor vehicles; and tobacco products.

Finished goods prices increase again in January

On a monthly basis, prices for finished goods were up 0.5% from December. Higher prices for petroleum products; motor vehicles; meat, fish and dairy products; lumber products; and electrical and communication products were responsible for this monthly rise.

Compared with January 2004, prices for finished goods were down by 0.4%. Lower prices for motor vehicles and electrical and communication products were the major contributors to the annual decline.

Higher prices for petroleum products; fruit, vegetable and feed products; machinery and equipment; rubber, leather and plastic products; furniture and fixtures; tobacco products; and chemical products partly offset the annual decrease.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Note: Indexes for the most recent six months shown are subject to revision.

- 1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
- ss indicates the S-level commodity code (from 9 to 28)
 - mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
 - nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
 - pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
 - rr indicates a split of a PCGA.

Note: Indexes for the most recent six months shown are subject to revision.

1) The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

2) The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Table 4

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \frac{\sum_i w^i}{\sum_i w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Income Trends in Canada

More than 2,000,000 facts at your fingertips!

Get the overall picture with nearly two decades of data for Canada, the provinces and 15 metropolitan areas

For \$195, you will find everything you need to know about income trends going back to 1980, through two recessions and recovery periods! Get accurate and reliable statistics about:

▶ income from employment... and other sources

- ▶ taxes
- ▶ impact of government transfers on family income
- ▶ differences in earnings between women and men
- ▶ income of Canada's seniors
- ▶ income inequality and low income
- ▶ and a lot more!

In these times of rapid change, it is more crucial than ever before to understand income trends of Canadians

With *Income Trends in Canada*, tracking and understanding developments in Canadian incomes is easy!

Use this CD-ROM to view trends with one mouse click. Create your own tables. Chart income data. And more!

Need more details? Check out *Income Trends in Canada* on our Web site at <http://www.statcan.ca/english/ads/72-202-XIE/index.htm> or contact your nearest Statistics Canada Regional Reference Centre at 1 800 263-1136.

Order *Income Trends in Canada* TODAY

(catalogue number 13F0022XCB) for \$195. In Canada, please add **either** GST and applicable PST **or** HST. Shipping charges outside Canada: for shipments to the United States, please add \$6. For shipments to other countries, please add \$10. To order, CALL 1 800 267-6677, FAX 1 877 287-4369 or MAIL: Statistics Canada, Circulation Management, Dissemination Division, 120 Parkdale Avenue, Ottawa, Ontario, Canada, K1A 0T6. Canadian Business Patterns

Profiling Corporate Canada... one community at a time

In the new economy where business is fueled by information, you need accurate, timely and comprehensive data to capture the complete perspective.

Nothing helps you leverage the power of information to profile Canada's business community faster, simpler or more effectively than the *Canadian Business Patterns (CBP)*.

This unique research tool provides detailed and reliable counts of business establishments by:

- nine employment size ranges
- geography groupings by province, metropolitan areas, census agglomerations, census divisions and census subdivisions
- and various levels of industry classification (SIC and NAICS).

Make better decisions — faster!

Use the *Canadian Business Patterns* to:

- study economic activity
- conduct administrative planning
- benchmark statistical surveys
- analyse economic change
- analyse market potential
- and much, much more!

Explore the world of business on disc

The CD-ROM *Canadian Business Patterns* provides you with the speed and reliability you need, combined with the freedom of flexibility you demand. Use the *CBP* to copy text right into your documents and databases, view data on a customized basis, and search, locate and print exactly what you are looking for.

CD-ROM Semi-annual (Cat. No. 61F0040XDB): starting from \$150

Design your data solutions to your specifications

Statistics Canada offers customized extractions from the *CBP* with your choice of geography, industry or one or more of the standard employment size ranges. We can also provide custom tabulations such as revenue-related data, non-standard geographies (e.g. enumeration areas) or your own employment size ranges starting at \$150. For more information, contact your nearest Statistics Canada regional office at 1 800 263-1136.

In Canada, please add **either** GST and applicable PST or HST. Shipping charges: no shipping charges for delivery in Canada. For shipments to the United States, please add \$6 per item ordered. For shipments to other countries, please add \$10 per item ordered. (Federal government clients must indicate their IS Organization Code and IS Reference Code on all orders.)

Ordering and subscription information

This product, catalogue no. 62-011-XIE, is published monthly in electronic format at a price of CAN\$19.00 per issue and CAN\$175.00 for a one-year subscription. To obtain a single issue or to subscribe, visit our website at www.statcan.ca, and select Our Products and Services.

This product is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription. The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Explanation of Methods Used and Additional Sources for Industrial Price Indexes	61

Highlights

Monthly prices for manufactured goods at the factory gate rose in February for a third consecutive month, posting their largest monthly increase since May 2004. Raw materials prices were up for a second month in a row as prices for crude oil continued to rise.

Prices for manufactured goods continue to increase

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), rose 1.1% from January to February. Higher prices for petroleum products, lumber products, motor vehicles, primary metals and pulp and paper products were the main sources of the monthly increase.

The 12-month change in the IPPI was 2.3%, down from January's increase of 3.3%.

The Raw Materials Price Index (RMPI) was up 3.1% from January to February, following a 4.3% increase registered the previous month. There were price increases in mineral fuels, non-ferrous metals, vegetable products as well as non-metallic minerals.

Compared with February last year, raw materials cost factories 11.8% more. This was down from the 12-month rise of 12.4% experienced in January but slightly higher than the 11.2% advance observed in December.

In February, the IPPI (1997=100) stood at 110.1, up from its revised level of 108.9 in January. The RMPI (1997=100) reached 135.4, up from a revised level of 131.3 in January.

IPPI: Monthly increase mostly due to petroleum products, lumber products and motor vehicles

On a month-over-month basis, manufacturers' prices rose 1.1% following an increase of 0.6% in January.

Petroleum and coal products prices increased 4.0% compared to January as gasoline and fuel oil prices rose. Lumber and other wood products were up 2.7% due to strong demand and supply concerns as strike activity continued in British Columbia. Prices for motor vehicles and other transport equipment increased 0.7%, mainly because of a weaker Canadian dollar. Primary metals increased 1.7% as higher prices were observed for nickel, copper, aluminum and zinc products. Prices for pulp and paper products rose 1.5% in response to increased demand and tight supplies.

Chemical products, meat, fish and dairy products, electrical and communication products, as well as fruit, vegetable and feed products also contributed to the increase in February.

IPPI: Petroleum and primary metals continue to be the major factors in the 12-month change

On a 12-month basis, the IPPI was up 2.3% in February. Prices for petroleum and coal products continued to have a major influence on the 12-month change, rising 18.1% from February 2004. If petroleum and coal product prices had been excluded, the IPPI would have increased only 1.0% rather than 2.3%.

Prices for primary metal products also had a big impact on the increase, rising 9.9% from a year ago. Primary steel, copper and aluminum products were the major contributors.

Metal fabricated products increased 9.6%, mainly the result of higher prices for steel. Chemical products, pulp and paper products, rubber, leather and plastic fabricated products, as well as furniture and fixtures also contributed to the 12-month increase in the IPPI.

These increases were partly offset by lower prices for motor vehicles and other transport equipment, which were down 4.4% from a year ago. Prices were also down compared with 12 months ago for lumber products, fruit, vegetable and feed products, meat, fish and dairy products and electrical and communication products.

RMPI: Crude oil prices push up the cost of raw materials

On a monthly basis, raw materials prices rose 3.1% in February. Mineral fuels were up compared to January, as crude oil prices increased 6.3% due to continuing strong demand and colder temperatures.

Prices for non-ferrous metals were up 4.2%, mainly due to higher prices for zinc, copper, lead, nickel and silver. Prices for vegetable products also rose 2.3% with higher prices observed for soybeans, canola, coffee and rubber.

Raw materials prices increase again

Ferrous materials decreased 1.4% from the previous month as iron and steel scrap prices were down 2.7%. Prices for wood products decreased 0.1% due to lower prices for logs and bolts. Animals and animal products decreased 0.1% as higher prices for cattle for slaughter (+3.9%) were offset by lower prices for hogs for slaughter (-3.0%), fish (-3.8%) as well as poultry (-0.7%).

On a 12-month basis, the price of raw materials rose 11.8% in February. Mineral fuels were up 26.8% with crude oil prices rising 35.2%. If mineral fuels had been excluded, the RMPI would have decreased 0.3% instead of rising 11.8%.

Prices for non-ferrous metals rose 7.5%, mainly because of higher prices for radio-active concentrates, zinc and copper. Animal and animal products prices rose 4.2% from February last year as higher prices were registered for cattle for slaughter, unprocessed whole milk, hogs for slaughter, and poultry. Higher prices were also observed for non-metallic mineral products which increased 6.6% from a year ago.

These increases were partly offset by lower prices for vegetable products, wood products as well as ferrous materials.

Impact of the exchange rate

Between January and February, the value of the Canadian dollar fell 1.2% against the US dollar. As a result, if the impact of the exchange rate had been excluded, the IPPI would have risen 0.8% compared to the actual 1.1% increase.

On a 12-month basis, the value of the Canadian dollar rose 7.2% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 4.2% between February 2004 and February 2005, rather than their actual 2.3% increase.

Prices for intermediate goods continue to increase

Prices for intermediate goods increased 1.2% from January. Higher prices for petroleum products; lumber products; primary metals; pulp and paper products; chemical products; motor vehicles; and meat, fish and dairy products were the major contributors to the increase.

Producers of intermediate goods received 4.4% more for their goods in February 2005 than in February 2004, down from the 5.9% increase registered in January. Higher prices for petroleum products; primary metal products; chemical products; metal fabricated products; pulp and paper products; and rubber, leather and plastic products were mainly responsible for the annual increase.

These increases were partly offset by declining prices for fruit, vegetable and feed products; lumber products; motor vehicles; meat, fish and dairy products; and tobacco products.

Finished goods prices increase again

On a monthly basis, prices for finished goods were up 0.7% from January. Higher prices for motor vehicles; petroleum products; meat, fish and dairy products; electrical and communication products; fruit, vegetable and feed products; and machinery and equipment were responsible for this monthly rise.

Compared with February 2004, prices for finished goods were down by 0.8%. Lower prices for motor vehicles, electrical and communication products and lumber products were the major contributors to the annual decline.

Higher prices for petroleum products; furniture and fixtures; fruit, vegetable and feed products; chemical products; rubber, leather and plastic products; machinery and equipment; and tobacco products partly offset the annual decrease.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Note: Indexes for the most recent six months shown are subject to revision.

- 1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor.
The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

Table 3

Industrial Product Price Indexes, by Industry and Industry Groups (1997=100)

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average

Note: Indexes for the most recent six months shown are subject to revision.

- 1) The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
- 2) The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are "must take" respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ,

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

DID YOU KNOW?

Top 5 reasons to subscribe to Internet publications

Save money.

Order online and you'll receive a 25% price reduction from that of our print publications.

Feel safe about ordering online.

Our secure site makes using your credit card online safe and easy. Guaranteed.

Be the first to know.

Access our Internet publications the minute they are released—no more waiting for delivery.

Get one price, many rewards.

Statistics Canada's online subscriptions offer unlimited access to your publication and up to three years of its previous issues.

Be green.

By consciously choosing electronic over paper, you're doing your part to be ecologically friendly. Feel good about doing business, respecting the environment and saving precious resources.

- ✓ Statistics Canada's website has **over 175 Internet publications** in 24 theme categories to choose from.
- ✓ Statistics Canada's website **www.statcan.ca** is THE place to go for the most current and accurate data on ***Agriculture, Trade, Health, Education*** and much, much more.
- ✓ You can **save time, money** and **avoid the hassles** of delivery. Discover the advantages of ordering online. In addition, you'll **receive a 25% price reduction** from that of our print publications.
- ✓ You can get **the latest information** regardless of location and time constraints—all you need is access to the Internet.

Choose from some of our most popular titles such as:

- Perspectives on Labour and Income (Cat. No. 75-001-XIE)
- Canadian Social Trends (Cat. No. 11-008-XIE)
- Consumer Price Index (Cat. No. 62-001-XIB)
- Health Reports (Cat. No. 82-003-XIE)
- Informat (Cat. No. 11-002-XIE)
- ... and many more titles.

Get right down to business with the freedom and flexibility of Statistics Canada's Internet publications.

Visit **www.statcan.ca**, go to our products and services and browse our Internet publications.

DISCOVER

labour market trends in seconds

When you need a snapshot of the labour market

...when you need quick answers or in-depth analysis

...when you need to see historical movements

...when you need labour-related data for a presentation or report

...you'll find that the *Labour Force Historical Review on CD-ROM* is the perfect solution.

This easy-to-use CD-ROM, issued annually, lets you discover labour market patterns in seconds! Incorporating a user-friendly data browser, the *Labour Force Historical Review on CD-ROM* is an essential tool providing:

Accurate, timely data...

- ✱ actual and seasonally adjusted data series
- ✱ on a monthly or annual basis

...plus historical information...

- ✱ over 25 years of data (from 1976 to 2004)

- ✱ allowing you to quickly spot trends as you browse different chart displays

...in a tremendously useful format!

- ✱ with thousands of cross-classified data series

- ✱ and the functionality for easy export of the data into any spreadsheet package for data manipulation
- ✱ plus effortless analysis of this large library of multi-dimensional statistics

At the click of a mouse, access key variables, such as:

- ✱ employment and unemployment levels and rates
- ✱ demographic characteristics including age, sex, educational attainment and family variables
- ✱ national, provincial, metropolitan areas and economic regions
- ✱ industry, occupation, wages, union membership, job tenure
- ✱ workplace size and hours worked ...and much more.

As researchers, economists, analysts, consultants and planners in both private enterprise and the public sector, you will value this comprehensive information resource for your labour-related questions, analysis or forecasting.

For more detailed information on this CD-ROM, visit our Web site at <http://www.statcan.ca/english/ads/71F0004XCB/index.htm>

The *Labour Force Historical Review on CD-ROM* (catalogue no. 71F0004XCB) is available for only \$209. In Canada, please add either GST and applicable PST or HST. Shipping charges: No shipping charges for delivery in Canada. For shipments to the United States, please add \$6. For shipments to other countries, please add \$10.

To order the CD ROM, CALL 1 800 267-6677, FAX 1 877 287-4369 or MAIL your order to Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, Canada.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^P preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Explanation of Methods Used and Additional Sources for Industrial Price Indexes	61

Highlights

Monthly prices for manufactured goods at the factory gate rose in March for a fourth consecutive month, but at a much slower pace than in February. Raw materials prices were up for a third month in a row as crude oil registered its largest increase since December 2002.

Prices for manufactured goods continue to increase

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), rose 0.3% from February to March. Higher prices for petroleum products, fruit, vegetable and feed products and rubber, leather and plastic products were the main sources of the monthly increase.

The 12-month change in the IPPI was 2.1%, down from February's increase of 2.5%.

The Raw Materials Price Index (RMPI) was up 6.2% from February to March, following a 3.0% increase the previous month. There were price increases in mineral fuels, animals and animal products, non-ferrous metals as well as vegetable products.

Compared to March of last year, raw materials cost factories 14.0% more. This was a much stronger rate of growth than the 12-month rise of 11.7% in February.

In March, the IPPI (1997=100) stood at 110.6, up from its revised level of 110.3 in February. The RMPI (1997=100) reached 143.7, up from a revised level of 135.3 in February.

IPPI: Monthly increase primarily due to higher prices for petroleum products

On a month-over-month basis, manufacturers' prices rose 0.3% following an increase of 1.2% in February.

Petroleum and coal products prices increased 7.1% compared to February as gasoline and fuel oil prices continue to rise. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.3% rather than increasing 0.3%.

Fruit, vegetable and feed products (+0.9%) as well as rubber, leather and plastic fabricated products (+0.4%) also contributed to the increase in March but to a much lesser degree.

Prices for motor vehicles and other transport equipment and electrical and communication products decreased 1.4% and 0.6% respectively, mainly because of the stronger Canadian dollar. Prices for pulp and paper products fell 0.5% in response to lower demand for newsprint paper. Lumber and other wood products were down 0.4% as inventories for softwood lumber remained strong.

IPPI: Petroleum and primary metals continue to be the major factors in the 12-month change

On a 12-month basis, the IPPI was up 2.1% in March. Prices for petroleum and coal products continued their influence on the 12-month change, rising 26.3% from March 2004. If petroleum and coal product prices had been excluded, the IPPI would have increased only 0.3% rather than 2.1%.

Prices for primary metal products also had a big impact on the increase, rising 8.7% from a year ago. Primary steel and nickel products were the major contributors to this annual increase.

Metal fabricated products increased 7.5%, as the effect of higher prices for steel continued to be felt. Chemical products, rubber, leather and plastic fabricated products, pulp and paper products, as well as non-metallic mineral products also contributed to the 12-month increase in the IPPI.

These increases were partly offset by lower prices for motor vehicles and other transport equipment, which were down 5.7% from a year ago. There were also 12-month price declines for lumber and other wood products (-4.5%), fruit, vegetable and feed products (-3.7%), meat, fish and dairy products (-2.0%) and electrical and communication products (-1.7%).

RMPI: Crude oil prices continue to push up the cost of raw materials

On a monthly basis, raw materials prices rose 6.2% in March. Mineral fuels were up 10.5% compared with February, as crude oil prices increased 12.6% due to continuing strong demand and supply concerns.

Animals and animal products increased 2.9%, led by higher prices for unprocessed whole milk, fish, hogs for slaughter as well as sheep and lambs for slaughter. Prices for non-ferrous

Raw materials prices continue to increase

metals were up 3.7% mainly due to higher prices for zinc and lead. Prices for vegetable products also rose 1.9% with higher prices for coffee, corn, canola and wheat.

Ferrous materials decreased 2.6% from the previous month as iron and steel scrap prices were down 3.0%. Prices for wood products decreased 0.1% due to lower prices for logs and bolts.

On a 12-month basis, the price of raw materials rose 14.0% in March. Mineral fuels were up 31.5% with crude oil prices rising 39.5%. If mineral fuels had been excluded, the RMPI would have decreased 0.6% instead of rising 14.0%.

Prices for non-ferrous metals rose 9.3%, mainly because of higher prices for zinc, radio-active concentrates, nickel, copper and lead. Animal and animal products prices rose 4.9% from March last year due primarily to higher prices for unprocessed whole milk, fish and poultry. Higher prices were also observed for non-metallic mineral products, which increased 8.4% from a year ago.

These increases were partly offset by lower prices for vegetable products, wood products as well as ferrous materials.

Impact of the exchange rate

Between February and March, the value of the Canadian dollar rose 1.9% against the US dollar. As a result, if the impact of the exchange rate had been excluded, the IPPI would have risen 0.8% compared with the actual 0.3% increase.

On a 12-month basis, the value of the Canadian dollar rose 9.2% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 4.5% between March 2004 and March 2005, rather than their actual 2.1% increase.

Prices for intermediate goods are up

Prices for intermediate goods increased 0.4% from February. Higher prices for petroleum products; fruit, vegetable and feed products; rubber, leather and plastic fabricated products; and chemical products were the major contributors to the increase.

Lower prices for motor vehicles; pulp and paper products; lumber products; electrical and communication products; and meat, fish and dairy products partially offset the monthly increase.

Producers of intermediate goods received 4.2% more for their goods in March 2005 than in March 2004. Higher prices for petroleum products; primary metal products; chemical products; metal fabricated products; pulp and paper products; and rubber, leather and plastic products were mainly responsible for the annual increase.

These increases were partly offset by declining prices for lumber products; fruit, vegetable and feed products; motor vehicles; meat, fish and dairy products; and electrical and communication products.

Finished goods prices decline

On a monthly basis, prices for finished goods edged down 0.1% from February. Higher prices for petroleum products, fruit, vegetable and feed products and beverages were offset by lower prices for motor vehicles, electrical and communication products, machinery and equipment and lumber products.

Compared with March 2004, prices for finished goods were down by 1.0%. Lower prices for motor vehicles; electrical and communication products; meat, fish and dairy products; lumber products; and machinery and equipment were the major contributors to the annual decline.

Higher prices for petroleum products; fruit, vegetable and feed products; chemical products; furniture and fixtures; rubber, leather and plastic products; chemical products; and tobacco products partly offset the annual decrease.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

		2005	134.8	135.6	137.2

Note: Indexes for the most recent six months shown are subject to revision.

- 1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
- ss indicates the S-level commodity code (from 9 to 28)
 - mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
 - nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
 - pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
 - rr indicates a split of a PCGA.

	2005	108.1	108.7	108.7
All other miscellaneous manufacturing															
v3822799 33999	2004	111.2	111.7	111.7	112.1	112.2	112.2	112.3	112.2	112.2	112.4	112.1	112.7	112.1	
	2005	113.1	113.5	113.5

Note: Indexes for the most recent six months shown are subject to revision.

- 1) The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
- 2) The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Table 4

Industrial Product Price Indexes, by Stage of Processing (1997=100)

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are "must take" respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

Canadian Business Patterns

Profiling Corporate Canada... one community at a time

In the new economy where business is fueled by information, you need accurate, timely and comprehensive data to capture the complete perspective.

Nothing helps you leverage the power of information to profile Canada's business community faster, simpler or more effectively than the *Canadian Business Patterns (CBP)*.

This unique research tool provides detailed and reliable counts of business establishments by:

- nine employment size ranges
- geography groupings by province, metropolitan areas, census agglomerations, census divisions and census subdivisions
- and various levels of industry classification (SIC and NAICS).

Make better decisions — faster!

Use the *Canadian Business Patterns* to:

- study economic activity
- conduct administrative planning
- benchmark statistical surveys
- analyse economic change
- analyse market potential
- and much, much more!

Explore the world of business on disc

The CD-ROM *Canadian Business Patterns* provides you with the speed and reliability you need, combined with the freedom of flexibility you demand. Use the *CBP* to copy text right into your documents and databases, view data on a customized basis, and search, locate and print exactly what you are looking for.

CD-ROM Semi-annual (Cat. No. 61F0040XDB): starting from \$150

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Explanation of Methods Used and Additional Sources for Industrial Price Indexes	61

Highlights

Monthly prices for manufactured goods at the factory gate increased for the fifth consecutive month in April. Raw materials prices were down from March as crude oil prices declined.

Prices for manufactured goods continue to increase

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), rose 0.5% from March to April. Higher prices for petroleum products, motor vehicles and other transport equipment, pulp and paper products, chemical products and electrical and communication products were the main sources of the monthly increase.

The 12-month change in the IPPI was 1.5%, down from March's increase of 2.3%.

The Raw Materials Price Index (RMPI) was down 1.6% from March to April, following a 6.3% increase the previous month. There were price decreases in mineral fuels, animals and animal products, non-ferrous metals as well as vegetable products.

Compared to April of last year, raw materials cost factories 13.3% more, down from the 12-month increase of 14.7% in March.

In April, the IPPI (1997=100) stood at 111.3, up from its revised level of 110.8 in March. The RMPI (1997=100) reached 142.2, down from a revised level of 144.5 in March.

IPPI: Monthly increase primarily due to higher prices for petroleum products

On a month-over-month basis, manufacturers' prices rose 0.5% following an increase of 0.3% in March.

Petroleum and coal products prices increased 3.4% compared to March as gasoline and fuel oil prices continue to rise. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.2% rather than increasing 0.5%.

Prices for motor vehicles and other transport equipment and electrical and communication products increased 1.1% and 0.6% respectively, mainly because of a weaker Canadian dollar. Prices for pulp and paper products rose 1.2% as a planned price increase by newsprint producers came into effect.

Chemical products (+0.6%), machinery and equipment (+0.3%) as well as rubber, leather and plastic fabricated products (+0.3%) also contributed to the increase in April but to a much lesser degree.

Lumber and other wood products were down 2.8% as a result of ample supplies for softwood lumber and less demand for particleboard. Primary metal products decreased 0.7% as prices for primary steel products and refined zinc products declined. Prices decreases were also observed for meat, fish and dairy products, fruit, vegetable and feed products as well as metal fabricated products.

IPPI: Petroleum, primary metals and chemical products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 1.5% in April. Prices for petroleum and coal products continued their influence on the 12-month change, rising 29.6% from April 2004. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.7% rather than increasing 1.5%.

Prices for primary metal products also had a big impact on the increase, rising 6.0% from a year ago. Primary steel and primary nickel products were the major contributors to this annual increase.

Chemical products increased 6.4% due to higher prices for organic industrial chemicals and synthetic resins. Metal fabricated products, rubber, leather and plastic fabricated products, non-metallic mineral products, furniture and fixtures, beverages as well as pulp and paper products also contributed to the 12-month increase in the IPPI.

These increases were partly offset by lower prices for motor vehicles and other transport equipment, which were down 5.4% from a year earlier. There were also 12-month price declines for lumber and other wood products (-9.8%), fruit, vegetable and feed products (-4.5%), meat, fish and dairy products (-3.3%) and electrical and communication products (-1.5%).

RMPI: Crude oil prices push down the cost of raw materials

On a monthly basis, raw materials prices fell 1.6% in April. Mineral fuels were down 1.6% compared to March, as crude oil prices decreased 1.9% due to an increase in inventories and a slight decline in demand.

Raw materials prices decrease

Animals and animal products decreased 2.6% as lower prices were registered for unprocessed whole milk, fish, cattle for slaughter as well as sheep and lambs for slaughter. Prices for non-ferrous metals were down 3.1% mainly due to lower prices for zinc, lead, silver and gold. Prices for vegetable products also dropped 1.1% with lower prices observed for coffee, wheat, corn and cocoa beans.

Ferrous materials increased 3.2% from the previous month as iron and steel scrap prices were up 4.3%. Prices for wood (+0.5%) and non-metallic minerals (+0.2%) also increased in April.

On a 12-month basis, the price of raw materials rose 13.3% in April. Mineral fuels were up 29.0% with crude oil prices rising 36.2%. If mineral fuels had been excluded, the RMPI would have only increased 0.1% instead of rising 13.3%.

Prices for non-ferrous metals rose 9.0%, mainly because of higher prices for radio-active concentrates, zinc, lead copper and nickel concentrates. Animal and animal products prices rose 3.7% from April last year due primarily to higher prices for unprocessed whole milk, hogs for slaughter and poultry. Higher prices were also observed for ferrous materials (+12.4%) and non-metallic mineral (+8.5%) products from a year ago.

These increases were partly offset by lower prices for vegetable and wood products.

Impact of the exchange rate

Between March and April, the value of the Canadian dollar fell 1.6% against the US dollar. As a result, if the impact of the exchange rate had been excluded, the IPPI would have been unchanged from March, compared to the actual 0.5% increase.

On a 12-month basis, the value of the Canadian dollar rose 8.6% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 3.7% between April 2004 and April 2005, rather than their actual 1.5% increase.

Prices for intermediate goods are up

Prices for intermediate goods increased 0.2% from March. Higher prices for petroleum products; pulp and paper products; chemical products; motor vehicles; and electrical and communication products were the major contributors to the increase.

Lower prices for lumber products; primary metal products; meat, fish and dairy products; fruit, vegetable and feed products; and metal fabricated products partially offset the monthly increase.

Producers of intermediate goods received 3.0% more for their goods in April 2005 than in April 2004. Higher prices for petroleum products; primary metal products; chemical products; metal fabricated products; rubber, leather and plastic products; and pulp and paper products were mainly responsible for the annual increase.

These increases were partly offset by declining prices for lumber products; fruit, vegetable and feed products; motor vehicles; meat, fish and dairy products; and electrical and communication products.

Finished goods prices increase

On a monthly basis, prices for finished goods were up 0.8% from March. Higher prices for petroleum products, motor vehicle; electrical and communication products; and machinery and equipment were the main contributors to this increase.

Lower prices for lumber products, meat fish and dairy products as well as pulp and paper products partly offset the monthly decrease.

Compared with April 2004, prices for finished goods were down by 0.8%. Lower prices for motor vehicles; lumber products; electrical and communication products; and meat, fish and dairy products were the major contributors to the annual decline.

Higher prices for petroleum products; fruit, vegetable and feed products; chemical products; rubber, leather and plastic products; furniture and fixtures; beverages; and metal fabricated products partly offset the annual decrease.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

		2005 134.9	139.2	144.7	146.9

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor.
The numeric descriptor is of the order ss-mm-nn-ppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

		2005 113.2	113.6	113.5	114.2

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum_i w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \frac{\sum_i w^i}{\sum_i w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^P preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Highlights

Monthly prices for manufactured goods at the factory gate were unchanged in May, following five consecutive months of increases. Raw materials prices were down in May from April as crude oil prices declined for a second straight month.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were unchanged from April to May. Lower prices for petroleum products and lumber and other wood products were offset by higher prices for motor vehicles and other transport equipment, meat, fish and dairy products, primary metal products, chemical products and electrical and communication products.

The 12-month change in the IPPI was down 0.3% in May, a significant drop from the 1.5% increase in April.

The Raw Materials Price Index (RMPI) fell 3.1% from April to May, following a 1.5% decrease the previous month. There were price decreases in mineral fuels, wood products as well as ferrous materials.

Compared to May of last year, raw materials cost factories 7.0% more, a significant decline from the 12-month increase of 13.5% for April.

In May, the IPPI (1997=100) stood at 111.4, unchanged from its revised level in April. The RMPI (1997=100) reached 138.0, down from a revised level of 142.4 in April.

IPPI: Lower prices for petroleum and lumber products

On a month-over-month basis, manufacturers' prices were unchanged in May following a 0.4% increase in April.

Prices for manufactured goods unchanged in May

Petroleum and coal products prices decreased 3.4% compared to April as gasoline and fuel oil prices declined for the first time in four months. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.4% rather than remaining unchanged.

Lumber and other wood products were down 2.6% as a result of a slowdown in construction activity and lower demand.

Prices for motor vehicles and other transport equipment and electrical and communication products increased 1.0% and 0.6% respectively, mainly because of a weaker Canadian dollar.

Meat, fish and dairy products were up 1.0% as higher prices were reported for pork and beef products. Primary metal products increased 0.6% as prices for nickel products were up by 13.5%. Price increases were also observed for chemical products and machinery and equipment.

IPPI: Motor vehicles and lumber products are the major factors in the 12-month change

On a 12-month basis, the IPPI was down 0.3% in May. Motor vehicles and other transport equipment were down 6.2% from a year ago, the consequence of a stronger Canadian dollar.

Lumber and other wood products declined 15.0% from May 2004 to May 2005, as year-over-year price decreases were recorded for softwood lumber (-17.6%), particleboard (-42.1%) and softwood plywood excluding Douglas Fir (-38.0%).

There were also 12-month price declines for fruit, vegetable and feed products (-4.2%), meat, fish and dairy products (-3.7%), electrical and communication products (-2.0%) and pulp and paper products (-1.0%).

However, prices for petroleum and coal products rose 11.0% from May 2004, dampening the 12-month decrease. If petroleum and coal product prices had been excluded, the IPPI would have fallen 1.2% rather than decreasing 0.3% from a year ago.

Prices for primary metal products also increased, rising 8.1% from May 2004. Primary steel and primary nickel products were the major contributors to this annual increase.

Chemical products increased 5.3%, due to higher prices for organic industrial chemicals and synthetic resins. Year-over-year increases were also observed for metal fabricated products, rubber, leather and plastic fabricated products, non-metallic mineral products as well as furniture and fixtures.

RMPI: Crude oil prices continue to push down the cost of raw materials

On a monthly basis, raw materials prices fell 3.1% in May. Mineral fuels were down 6.0% compared to April, as crude oil prices decreased 7.2% due to higher levels of inventories and a slight decline in demand.

Ferrous materials decreased 3.3% from the previous month, as iron and steel scrap prices were down 6.5%. Prices for wood products, more specifically softwood logs and bolts, also decreased 1.7% in May.

Raw materials prices decrease again

Prices for non-ferrous metals were up 1.6%, mainly due to higher prices for radio-active concentrates as well as nickel concentrates. Prices for vegetable products also increased 1.2%, with higher prices observed for coffee, natural rubber and canola. Animals and animal products increased 0.3%, as prices for swine for slaughter were up 6.0% from the previous month.

On a 12-month basis, the price of raw materials rose 7.0% in May, down from the double digit increases observed in the last 12 months. Mineral fuels were up 14.2% with crude oil prices rising 17.3%. If mineral fuels had been excluded, the RMPI would have only increased 0.4% instead of rising 7.0%.

Prices for non-ferrous metals rose 13.4%, mainly because of higher prices for radio-active concentrates, zinc, nickel, copper and lead concentrates. Higher prices were also observed for ferrous materials and non-metallic mineral products, which increased 18.7% and 7.9% respectively from a year ago.

Vegetable products were down 14.5% from May 2004, as prices were down for corn, wheat, soybeans and canola. Wood products also decreased 8.7% from a year ago. Animal and animal products prices were almost unchanged from a year ago (-0.1%). Lower prices for swine for slaughter were offset by higher prices of unprocessed whole milk.

Impact of the exchange rate

Between April and May, the value of the Canadian dollar fell 1.6% against the US dollar. As a result, if the impact of the exchange rate had been excluded, the IPPI would have declined 0.4% instead of remaining unchanged from April.

On a 12-month basis, the value of the Canadian dollar rose 9.8% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 2.2% between May 2004 and May 2005, rather than their actual 0.3% decline.

Prices for intermediate goods are down

Prices for intermediate goods decreased 0.2% from April. Lower prices for petroleum products and lumber products were the major contributors to the decrease.

Higher prices for primary metal products; motor vehicles; chemical products; fruit, vegetable and feed products; and electrical and communication products partially offset the monthly decrease.

Producers of intermediate goods received 1.2% more for their goods in May 2005 than in May 2004. Higher prices for petroleum products; primary metal products; chemical products; metal fabricated products; and rubber, leather and plastic products were mainly responsible for the annual increase.

These increases were partly offset by declining prices for lumber products; fruit, vegetable and feed products; motor vehicles; meat, fish and dairy products; and electrical and communication products.

Finished goods prices increase

On a monthly basis, prices for finished goods were up 0.3% from April. Higher prices for motor vehicle; electrical and communication products; and meat, fish and dairy products were the main contributors to this increase.

Lower prices for petroleum and lumber products partly offset the monthly increase.

Compared with May 2004, prices for finished goods were down by 2.5%. Lower prices for motor vehicles; electrical and communication products; meat, fish and dairy products; and lumber products were the major contributors to the annual decline.

Higher prices for petroleum products; furniture and fixtures; chemical products; fruit, vegetable and feed products; and rubber, leather and plastic products partly offset the annual decrease.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Table 2

Industrial Product Price Indexes, by Commodity and Commodity Aggregations (1997=100) - Continued

			Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
Nickel products															
v1575294	20 48	2004	191.5	214.0	167.6	176.6	153.5	179.8	207.1	188.1	173.8	176.2	177.8	164.3	180.9
		2005	185.8	196.0	201.9	202.0	229.2
Other non-ferrous metal products															
v1575299	20 49	2004	102.7	107.6	109.9	109.5	104.1	103.7	107.0	106.6	102.8	104.6	103.7	103.8	105.5
		2005	103.1	107.6	108.6	106.8	106.0
Primary refined non-ferrous metals															
v1575300	20 49 01	2004	101.4	106.7	109.4	106.8	103.4	103.2	105.3	104.8	101.5	102.2	100.8	102.4	104.0
		2005	102.4	106.2	107.7	104.9	103.9
Refined zinc including secondary															
v1575302	20 49 01 2560	2004	72.1	77.7	79.2	72.3	73.2	72.6	71.0	70.5	68.0	69.6	70.6	76.9	72.8
		2005	80.8	86.7	92.7	83.2	82.2
Gold and gold alloys in primary forms															
v1575304	20 49 01 2563	2004	117.2	119.1	117.4	117.9	115.0	116.0	116.3	115.7	114.2	114.6	114.9	117.9	116.4
		2005	113.7	115.4	116.7	115.6	115.6
Silver and platinum															
v1575305	20 49 01 2564	2004	129.9	136.5	149.3	149.2	128.2	124.3	132.9	137.7	128.9	137.4	139.2	131.8	135.4
		2005	127.6	137.9	137.9	136.3	136.5
Other non-ferrous metal refinery shapes															
v1575309	20 49 01 2570	2004	90.1	102.3	111.8	114.7	112.7	106.2	104.8	103.5	111.6	107.8	106.4	103.7	106.3
		2005	105.9	112.9	112.9	111.3	114.2
Secondary metals alloyed (non-ferrous)															
v1575323	20 49 03	2004	107.7	109.0	114.0	124.5	127.8	129.0	132.4	129.3	138.1	135.5	132.8	131.9	126.0
		2005	129.0	129.0	130.1	130.1	130.1
Manufactured products, other non-ferrous metals															
v1575326	20 49 04	2004	106.6	110.1	111.1	116.1	105.3	105.0	111.8	111.5	105.5	110.5	110.8	107.2	109.3
		2005	104.7	111.4	110.7	110.8	110.9
Precious metal basic manufactured shapes															
v1575327	20 49 04 4550	2004	117.5	121.5	124.0	132.2	113.9	113.2	124.8	124.8	115.7	124.9	126.5	120.1	121.6
		2005	115.3	126.0	125.1	124.9	124.0
Precious metal and alloys primary forms															
v1575336	20 49 91 0001	2004	120.2	124.1	127.5	131.2	117.6	116.7	123.8	124.7	118.2	124.3	125.5	122.0	123.0
		2005	117.6	125.1	125.2	124.3	124.0
Other non-ferrous base metals															
v1575337	20 49 91 0002	2004	105.4	107.8	107.7	109.3	106.0	104.8	101.6	98.9	97.7	91.4	76.2	81.0	99.0
		2005	83.1	82.6	75.4	80.4	75.2
METAL FABRICATED PRODUCTS															
v1575338	21	2004	108.6	110.2	112.8	115.3	116.7	117.7	118.8	120.2	121.0	121.2	120.9	120.8	117.0
		2005	121.6	122.3	122.2	122.1	122.1
Boilers, tanks and plates															
v1575339	21 50	2004	107.1	108.5	112.2	115.0	116.3	117.4	121.4	124.4	125.5	126.3	126.7	127.5	119.0
		2005	129.5	129.7	131.0	130.7	130.7
Power boilers and parts															
v1575340	21 50 01	2004	110.4	110.5	112.9	114.1	115.1	115.4	116.2	119.2	120.6	120.1	121.2	121.5	116.4
		2005	123.5	122.0	125.4	125.1	125.1
Tanks and plates															
v1575343	21 50 02	2004	105.9	107.8	112.0	115.4	116.8	118.1	123.3	126.3	127.2	128.6	128.7	129.6	120.0
		2005	131.6	132.5	133.1	132.7	132.8
Tanks															
v1575345	21 50 02 4621	2004	111.5	111.7	113.8	114.1	114.5	114.8	121.5	121.5	122.5	123.4	127.6	130.2	118.9
		2005	130.6	132.0	134.5	134.5	134.5
Fabricated structural metal products															
v1575346	21 51	2004	107.8	110.7	114.8	119.4	119.8	120.7	122.6	125.9	125.2	124.2	123.4	122.0	119.7
		2005	123.1	126.2	125.5	125.6	125.7
Structural shapes, steel including fabricated															
v1575348	21 51 01 4475	2004	98.1	103.5	111.7	122.8	122.8	122.1	121.6	131.9	128.9	124.9	121.6	117.5	119.0
		2005	119.6	123.7	121.7	121.3	121.7
Prefabricated metal building and structure															
v1575349	21 51 02	2004	108.2	110.3	116.2	121.4	122.4	124.6	128.3	131.2	130.9	130.4	130.3	128.8	123.6
		2005	128.9	133.2	132.6	132.9	133.0

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor.
The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

		2005	113.2	113.6	113.6	114.3	114.5

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are "must take" respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^P preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Highlights

Monthly prices for manufactured goods at the factory gate were unchanged in June, following a slight decrease in May. Raw materials prices were up in June after two months of decline.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were unchanged from May to June. Higher prices for petroleum products, fruit, vegetable and feed products, lumber and other wood products and chemical products were offset by lower prices for motor vehicles and other transport equipment, meat, fish and dairy products, primary metal products, pulp and paper products and electrical and communication products.

The 12-month change in the IPPI was 0.2%, up from May's decrease of 0.3% but much lower than the year-over-year increases registered in the first four months of 2005.

The Raw Materials Price Index (RMPI) was up 5.4% from May to June, following a 3.2% decrease the previous month. There were price increases in mineral fuels, non-ferrous metals as well as vegetable products.

Compared to June of last year, raw materials cost factories 13.9% more, a significant rise from the 12-month increase of 7.0% registered for May but similar to the rate of growth observed since January 2005.

In June, the IPPI (1997=100) stood at 111.4, unchanged from May's level. The RMPI (1997=100) reached 145.4, up from 138.0 in May.

IPPI: Higher prices for petroleum and lumber products

On a month-over-month basis, manufacturers' prices were unchanged in June following a decrease of 0.1% in May.

Petroleum and coal products prices were 4.6% higher compared to May as gasoline and fuel oil prices rose 5.1%. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.5%, rather than remaining unchanged.

Lumber and other wood products were up 0.4% as a result of a slight increase in demand. Higher prices were also observed for fruit, vegetable and feed products (+0.6%) as well as chemical products (+0.3%).

Prices for motor vehicles and other transport equipment (-0.9%) and electrical and communication products (-0.3%) fell, mainly because of a stronger Canadian dollar.

Meat, fish and dairy products were down 1.7% as lower prices were reported for pork and beef products. Primary metal products decreased 0.8% as lower prices were observed for nickel products, steel products and aluminum products. Price decreases were also registered for pulp and paper products, metal fabricated products and machinery and equipment.

Prices for manufactured goods unchanged in June

IPPI: Petroleum, chemical and primary metal products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 0.2% in June. Prices for petroleum and coal products rose 19.4% from June 2004, a significant increase from the 10.7% rise in May. If petroleum and coal product prices had been excluded, the IPPI would have decreased 1.5% rather than increasing 0.2% from a year ago.

Chemical products increased 6.0% due to higher prices for industrial chemicals and synthetic resins. Prices for primary metal products also increased, rising 4.3% from June 2004. Primary nickel, copper and steel products were the major contributors to this annual increase.

Prices were also higher than one year ago for metal fabricated products, rubber, leather and plastic fabricated products, non-metallic mineral products as well as furniture and fixtures.

However, motor vehicles and other transport equipment were down 5.9% from a year ago, the consequence of a stronger Canadian dollar.

Lumber and other wood products declined 12.0% from June 2004 to June 2005, as year-over-year price decreases were recorded for softwood lumber (-15.3%), particleboard (-29.5%) and softwood plywood excluding Douglas fir (-35.4%).

There were also 12-month price declines for meat, fish and dairy products (-5.2%), fruit, vegetable and feed products (-3.1%), pulp and paper products (-2.6%) and electrical and communication products (-2.0%).

RMPI: Crude oil prices push up the cost of raw materials

On a monthly basis, raw materials prices rose 5.4% in June. Mineral fuels were up 10.8% compared to May, as crude oil prices increased 13.0% due to concerns about supply disruptions and production capacity.

Prices for non-ferrous metals were up 1.6%, mainly due to higher prices for copper concentrates as well as radio-active concentrates. Prices for vegetable products also increased 1.5%, with higher prices observed for grains, oilseeds and natural rubber.

However, prices for animal and animal products declined 1.9% compared to the previous month as prices for hogs for slaughter were down 8.2%. Ferrous materials decreased 2.5% from the previous month as iron and steel scrap prices were down 3.4%. Prices for non-metallic minerals and wood products also decreased in June.

On a 12-month basis, the price of raw materials rose 13.9% in June, up from the 7.0% year-over-year increase in May. Mineral fuels were up 29.5% with crude oil prices rising 38.1%. If mineral fuels had been excluded, the RMPI would have only increased 0.2% instead of rising 13.9%.

Prices for non-ferrous metals rose 14.2%, mainly because of higher prices for radio-active concentrates, copper, zinc, lead and nickel concentrates. Higher prices were also observed for non-metallic mineral products, ferrous materials and animal and animal products.

Raw materials prices increase

Vegetable products were down 14.4% from June 2004 as prices were down for corn, wheat, barley, soybeans and canola. Wood products also decreased 9.2% from a year ago.

Impact of the exchange rate

Between May and June, the value of the Canadian dollar rose 1.2% against the US dollar. As a result, if the impact of the exchange rate had been excluded, the IPPI would have increased 0.3% instead of remaining unchanged from May.

On a 12-month basis, the value of the Canadian dollar rose 9.5% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 2.6% between June 2004 and June 2005, rather than their actual 0.2% increase.

Prices for intermediate goods increase

Prices for intermediate goods increased 0.2% from May. Higher prices for petroleum products, fruit, vegetable and feed products, as well as lumber products were the major contributors to the increase.

Lower prices for meat, fish and dairy products; pulp and paper products; primary metal products; and motor vehicles partially offset the monthly increase.

Producers of intermediate goods received 1.4% more for their goods this June than in June 2004. Higher prices for petroleum products; chemical products; primary metal products; metal fabricated products; rubber, leather and plastic products; and non-metallic mineral products were mainly responsible for the annual increase.

These increases were partly offset by declining prices for lumber products; pulp and paper products; fruit, vegetable and feed products; meat, fish and dairy products; motor vehicles; and electrical and communication products.

Finished goods prices decline

On a monthly basis, prices for finished goods were down 0.2% from May. Lower prices for motor vehicles; meat, fish and dairy products; electrical and communication products; and machinery and equipment were the main contributors to this decrease.

Higher prices for petroleum and chemical products partly offset the monthly decline.

Compared with June 2004, prices for finished goods were down 1.7%. Lower prices for motor vehicles; meat, fish and dairy products; electrical and communication products; and lumber products were the major contributors to the annual decline.

Higher prices for petroleum products; chemical products; furniture and fixtures; rubber, leather and plastic products; tobacco products; metal fabricated products; and fruit, vegetable and feed products partly offset the annual decrease.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Table 2

Industrial Product Price Indexes, by Commodity and Commodity Aggregations (1997=100) - Continued

			Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
Construction machinery and equipment															
v1575466	22 54 05	2004	110.4	110.8	110.9	111.2	111.3	111.4	111.8	112.6	112.8	112.8	112.8	112.8	111.8
		2005	112.8	112.9	112.9	112.9	112.9	112.9
Mobile earth moving and allied equipment, attachments and parts															
v1575467	22 54 05 5220	2004	107.8	107.8	107.8	107.8	108.0	108.2	108.2	108.2	108.4	108.4	108.4	108.4	108.1
		2005	108.4	108.4	108.5	108.5	108.5	108.5
Mixing and paving equipment (concrete, asphalt)															
v1575468	22 54 05 5225	2004	109.6	111.7	112.7	113.9	113.9	113.9	116.3	116.3	116.3	116.3	116.3	116.3	114.5
		2005	116.3	116.9	116.9	116.9	116.9	116.9
Other general purpose machinery and equipment															
v1575470	22 54 06	2004	108.6	108.6	108.5	108.6	108.9	108.7	109.2	109.3	109.5	109.6	109.7	110.1	109.1
		2005	110.0	110.2	110.2	110.5	111.0	110.9
Ball bearings, roller bearings															
v1575472	22 54 06 5042	2004	105.2	106.0	105.9	106.3	107.0	106.6	105.8	105.6	107.7	109.2	110.6	111.2	107.3
		2005	111.3	111.6	111.1	111.5	115.3	115.0
Hydraulic power transmission equipment															
v1575474	22 54 06 5044	2004	121.4	121.4	121.4	121.4	121.4	121.4	128.4	128.4	128.4	128.4	128.4	128.4	124.9
		2005	120.9	120.9	120.9	120.9	120.9	120.9
Mechanical power transmission equipment															
v1575475	22 54 06 5045	2004	112.4	112.4	112.4	112.4	112.9	112.9	112.9	112.9	112.9	112.9	112.9	112.9	112.7
		2005	112.9	112.9	114.9	114.9	114.9	114.9
Industrial furnaces, kilns and ovens															
v1575476	22 54 06 5050	2004	102.0	102.0	102.0	102.0	102.0	102.0	102.0	102.0	102.0	102.0	102.0	102.0	102.0
		2005	101.7	101.7	101.7	101.7	101.7	101.7
Fans and blowers, industrial, and parts															
v1575479	22 54 06 5074	2004	103.4	103.4	103.4	105.3	105.3	105.3	105.3	105.3	106.2	106.8	106.8	107.8	105.4
		2005	107.8	107.8	107.8	110.0	110.0	110.0
Packaging machinery and parts															
v1575483	22 54 06 5091	2004	112.8	113.7	113.7	115.9	116.9	116.3	115.3	116.5	115.8	114.7	113.3	113.9	114.9
		2005	116.2	116.6	115.9	119.3	119.9	119.4
Other machinery classified by function and parts															
v1575485	22 54 06 5097	2004	106.8	106.8	108.9	108.9	108.9	108.9	108.6	108.6	108.6	108.9	108.9	108.9	108.5
		2005	108.7	109.1	109.1	109.6	110.0	110.0
Refrigerated enclosures															
v1575489	22 54 06 6536	2004	100.0	100.0	100.0	95.8	95.8	95.8	95.8	95.8	95.8	95.8	95.8	96.3	96.9
		2005	100.2	100.2	100.2	100.2	100.2	100.2
Other air conditioning and refrigeration equipment															
v1575492	22 54 06 6543	2004	107.8	105.7	105.7	105.9	106.4	106.1	105.6	105.4	105.1	104.5	105.6	105.9	105.8
		2005	110.2	110.4	110.1	110.4	110.6	110.4
Parts, air conditioning and refrigeration equipment															
v1575493	22 54 06 6544	2004	108.4	109.2	109.1	109.5	110.3	109.8	109.0	108.8	108.2	107.2	106.0	106.5	108.5
		2005	106.7	107.0	106.5	106.9	107.4	107.0
Scales and balances															
v1575497	22 54 06 7066	2004	106.1	106.1	106.1	106.3	106.3	106.3	106.9	106.9	106.9	106.9	116.5	116.5	108.2
		2005	117.2	117.2	117.2	117.2	117.2	117.2
Industrial pumps															
v1575481	22 54 06 5080 10	2004	110.5	108.6	108.6	108.6	108.6	108.6	108.6	108.6	108.9	108.9	108.9	109.9	108.9
		2005	110.6	111.3	111.3	111.3	111.3	111.3
Pumps, household use															
v1575482	22 54 06 5080 20	2004	121.3	121.3	121.3	121.3	121.3	121.3	123.6	123.6	123.6	123.6	123.6	123.6	122.5
		2005	127.8	127.6	127.6	127.6	127.6	127.6
Fans and power ventilators, electric															
v1575494	22 54 06 6920	2004	106.7	106.7	107.1	107.1	107.1	107.1	107.4	107.4	110.1	111.9	111.9	114.6	108.8
		2005	114.6	114.6	114.6	114.6	114.6	114.6
Other specialized machinery and equipment															
v1575500	22 54 07	2004	105.6	106.3	106.7	106.9	107.6	107.4	106.8	106.8	106.4	106.0	105.1	105.6	106.4
		2005	105.9	106.3	105.9	106.2	106.6	106.3
Woodland log handling and tree harvesting equipment and parts															
v1575501	22 54 07 5191	2004	104.5	107.4	107.3	108.1	110.1	109.4	107.4	108.4	107.1	107.3	104.4	105.7	107.3
		2005	106.0	107.6	106.2	107.4	108.5	107.6

Note: Indexes for the most recent six months shown are subject to revision.

1. The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor.

The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details

pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)

rr indicates a split of a PCGA.

Table 3

Industrial Product Price Indexes, by Industry and Industry Groups (1997=100)

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average

Industrial Product Price Indexes, by Industry and Industry Groups (1997=100) - Continued

			Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
Other millwork															
v3822632	321919	2004 2005	108.6 111.7	110.3 112.8	111.3 112.6	112.6 112.4	114.1 112.0	113.8 112.0	114.0 ..	114.8 ..	114.9 ..	112.3 ..	110.6 ..	111.5 ..	112.4 ..
Wood container and pallet manufacturing															
v3822633	32192	2004 2005	117.5 118.6	117.7 118.7	117.8 118.7	118.4 117.4	118.6 117.4	118.2 117.3	118.2 ..	119.0 ..	118.9 ..	118.6 ..	118.4 ..	118.5 ..	118.3 ..
Paper manufacturing															
v3822635	322	2004 2005	98.2 102.7	100.4 104.3	101.9 103.5	104.5 105.1	106.3 105.1	107.3 104.0	106.9 ..	106.8 ..	105.3 ..	103.6 ..	100.7 ..	101.4 ..	103.6 ..
Pulp, paper and paperboard mills															
v3822636	3221	2004 2005	92.6 96.9	95.5 98.9	97.4 97.9	100.4 99.8	102.6 99.7	103.8 98.5	102.6 ..	102.2 ..	100.2 ..	98.0 ..	94.6 ..	95.4 ..	98.8 ..
Pulp mills															
v3822637	32211	2004 2005	96.0 99.2	100.2 102.9	104.6 102.5	109.9 104.9	112.9 102.7	115.5 99.9	112.7 ..	110.5 ..	104.6 ..	98.8 ..	94.4 ..	97.4 ..	104.8 ..
Paper (except newsprint) mills															
v3822639	322121	2004 2005	93.4 97.8	95.2 98.2	95.5 97.5	97.1 98.5	99.1 98.8	99.4 98.2	99.9 ..	100.3 ..	99.5 ..	100.5 ..	98.1 ..	97.6 ..	98.0 ..
Newsprint mills															
v3822640	322122	2004 2005	86.0 90.5	88.9 92.5	90.1 90.8	92.8 93.0	94.6 94.4	95.3 93.7	93.6 ..	93.7 ..	93.3 ..	91.4 ..	88.0 ..	88.3 ..	91.3 ..
Paperboard container manufacturing															
v3822643	32221	2004 2005	124.3 132.2	124.0 131.9	124.0 131.7	126.0 132.7	126.4 132.9	126.7 132.2	130.7 ..	131.8 ..	132.0 ..	132.5 ..	130.7 ..	130.8 ..	128.3 ..
Paper bag and coated and treated paper manufacturing															
v3822644	32222	2004 2005	110.6 111.9	110.7 112.9	110.7 112.6	110.4 113.4	110.5 113.6	111.2 113.4	111.2 ..	112.2 ..	113.2 ..	113.4 ..	113.3 ..	113.3 ..	111.7 ..
Other converted paper product manufacturing															
v3822646	32229	2004 2005	111.9 112.8	112.2 113.0	112.3 113.9	111.7 114.0	112.0 113.1	112.1 113.0	112.1 ..	112.3 ..	112.9 ..	113.0 ..	113.0 ..	113.2 ..	112.4 ..
Printing and related support activities															
v3822647	323	2004 2005	112.1 115.1	112.8 115.4	112.9 115.3	113.2 115.6	113.7 115.7	114.2 115.5	114.5 ..	114.4 ..	114.7 ..	114.7 ..	114.2 ..	114.5 ..	113.8 ..
Printing															
v3822648	32311	2004 2005	112.1 115.0	112.7 115.4	112.9 115.3	113.2 115.5	113.7 115.7	114.1 115.5	114.5 ..	114.4 ..	114.7 ..	114.7 ..	114.2 ..	114.5 ..	113.8 ..
Petroleum and coal products manufacturing															
v3822650	324	2004 2005	139.5 164.1	145.5 171.2	146.5 184.8	147.8 189.7	165.8 183.1	160.5 191.7	160.7 ..	166.6 ..	169.2 ..	180.6 ..	171.7 ..	159.4 ..	159.5 ..
Petroleum refineries															
v3822651	32411	2004 2005	140.9 166.8	147.2 174.6	148.3 189.0	149.6 194.2	169.0 186.9	163.2 196.0	163.1 ..	169.4 ..	172.3 ..	184.7 ..	175.2 ..	161.8 ..	162.1 ..
Asphalt paving, roofing and saturated materials manufacturing															
v3822652	32412	2004 2005	122.5 129.4	124.9 130.8	126.0 137.9	128.5 141.3	130.5 142.1	130.8 142.5	135.9 ..	136.2 ..	135.1 ..	133.0 ..	132.0 ..	128.7 ..	130.3 ..
Chemical manufacturing															
v3822654	325	2004 2005	110.5 117.2	110.3 118.7	110.8 120.0	112.0 120.5	114.3 120.5	113.9 120.9	115.2 ..	116.1 ..	116.7 ..	118.0 ..	117.5 ..	117.8 ..	114.4 ..
Petrochemical manufacturing															
v3822656	32511	2004 2005	169.4 193.4	162.3 208.0	161.8 216.6	173.3 214.5	179.2 207.7	178.1 212.8	187.2 ..	190.9 ..	194.0 ..	203.3 ..	202.9 ..	209.0 ..	184.3 ..
Industrial gas manufacturing															
v3822657	32512	2004 2005	115.4 114.0	111.0 112.4	108.4 110.0	109.3 113.9	115.3 111.8	114.1 125.2	116.0 ..	112.5 ..	112.9 ..	114.5 ..	111.7 ..	113.6 ..	112.9 ..
Synthetic dye and pigment manufacturing															
v3822658	32513	2004 2005	106.8 108.1	107.1 108.3	107.1 108.1	107.2 108.3	107.5 108.4	107.3 108.2	107.2 ..	107.1 ..	106.9 ..	107.2 ..	106.7 ..	106.9 ..	107.1 ..
Other basic chemical manufacturing															
v3822659	32518, 32519	2004 2005	106.9 113.6	107.3 114.6	107.7 115.1	108.1 114.7	110.1 115.9	109.8 116.6	110.4 ..	110.8 ..	111.1 ..	112.0 ..	111.4 ..	112.2 ..	109.8 ..

Note: Indexes for the most recent six months shown are subject to revision.

See footnote(s) at end of table.

Table 3

Industrial Product Price Indexes, by Industry and Industry Groups (1997=100) - Continued

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
Resin, synthetic rubber, artificial and synthetic fibres and filaments manufacturing														
v3822660 3252	2004	98.5	99.3	100.1	100.3	104.2	103.7	105.2	105.8	106.4	107.5	106.3	105.8	103.6
	2005	107.0	106.5	107.6	108.6	109.2	108.0
Pesticide, fertilizer and other agricultural chemical manufacturing														
v3822661 3253	2004	105.6	106.6	107.1	107.4	108.2	106.5	105.3	107.2	107.3	110.0	110.7	109.9	107.7
	2005	110.3	110.6	112.9	115.4	117.9	117.8
Pharmaceutical and medicine manufacturing														
v3822664 3254	2004	108.0	108.1	108.3	108.2	108.2	108.2	108.8	108.7	108.6	108.6	108.6	108.5	108.4
	2005	108.7	108.8	108.8	108.9	109.0	109.0
Paint and coating manufacturing														
v3822666 32551	2004	113.3	113.6	113.6	114.0	115.2	114.6	114.9	115.8	116.0	116.1	116.5	116.5	115.0
	2005	117.8	117.8	117.8	118.1	118.1	118.1
Soap and cleaning compound manufacturing														
v3822669 32561	2004	105.6	105.7	106.0	106.3	106.7	106.4	106.4	107.9	107.7	108.3	107.9	108.0	106.9
	2005	108.2	109.4	108.3	108.4	108.3	108.4
Toilet preparation manufacturing														
v3822670 32562	2004	110.2	108.4	110.2	108.9	109.2	110.7	111.3	110.6	108.9	109.4	109.6	107.1	109.5
	2005	109.5	109.6	109.2	108.8	108.5	108.5
Other chemical product manufacturing														
v3822671 3259	2004	101.7	103.0	104.3	104.9	108.9	108.8	109.6	110.7	112.2	111.0	109.3	108.0	107.7
	2005	108.4	109.2	110.0	112.8	112.9	112.5
Plastic product manufacturing														
v3822673 3261	2004	105.6	106.2	106.7	107.5	108.2	108.8	109.4	109.6	110.1	110.8	110.8	111.5	108.8
	2005	112.8	112.7	113.6	113.9	114.1	113.7
Unsupported plastic film, sheet and bag manufacturing														
v3822674 32611	2004	104.8	105.4	107.3	108.9	109.1	108.8	109.5	108.7	110.0	110.8	110.3	111.2	108.7
	2005	113.3	111.8	113.6	114.1	114.9	115.1
Plastic pipe, pipe fitting and unsupported profile shape manufacturing														
v3822675 32612	2004	106.0	106.8	107.5	108.7	110.5	112.9	113.2	114.6	115.1	115.8	114.5	115.3	111.7
	2005	117.6	118.1	119.5	119.7	119.5	118.5
Polystyrene, urethane and other foam product manufacturing														
v3822677 32614, 32615	2004	109.2	108.8	108.9	109.1	109.6	110.1	110.9	110.9	111.2	112.6	112.9	113.8	110.7
	2005	113.4	113.5	113.7	113.8	113.8	113.8
Motor vehicle plastic parts manufacturing														
v3822680 326193	2004	97.0	97.2	97.2	97.2	97.4	97.2	97.5	97.4	97.3	97.2	97.2	97.3	97.3
	2005	97.4	97.5	97.3	97.4	97.6	97.5
Miscellaneous plastic product manufacturing														
v3822681 326191, 326198	2004	109.3	110.3	110.2	111.1	111.8	112.9	113.7	114.2	114.8	115.9	116.2	117.1	113.1
	2005	118.5	119.0	119.8	120.0	120.0	119.5
Rubber product manufacturing														
v3822682 3262	2004	100.6	100.6	100.8	101.4	101.5	101.3	100.9	100.9	101.0	101.0	101.0	101.6	101.1
	2005	101.7	102.0	102.4	102.5	102.6	102.6
Tire manufacturing														
v3822683 32621	2004	100.7	100.7	101.1	102.0	102.0	101.8	101.2	101.2	101.5	101.6	101.9	102.8	101.5
	2005	102.8	102.9	103.4	103.4	103.5	103.5
Rubber and plastic hose and belting manufacturing														
v3822684 32622	2004	119.3	119.3	119.3	119.4	119.5	119.6	119.7	119.7	120.0	120.0	119.6	119.7	119.6
	2005	120.5	121.2	122.2	122.2	122.1	122.1
Other rubber product manufacturing														
v3822685 32629	2004	95.2	95.4	95.3	95.5	95.8	95.4	95.3	95.2	95.1	94.9	94.5	94.7	95.2
	2005	94.8	95.4	95.2	95.6	95.8	95.7
Non-metallic mineral product manufacturing														
v3822686 327	2004	111.9	112.1	112.5	112.9	113.0	113.2	113.3	113.8	114.2	114.0	114.2	114.3	113.3
	2005	116.2	116.5	116.6	116.7	116.7	116.7
Clay product and refractory manufacturing														
v3822687 3271	2004	115.1	114.8	114.9	115.7	116.0	116.3	116.4	116.4	116.6	116.0	115.7	117.5	116.0
	2005	117.2	117.1	117.5	117.6	118.2	118.2
Glass and glass product manufacturing														
v3822688 3272	2004	99.1	100.4	100.5	100.6	100.7	100.6	100.3	100.4	100.9	100.8	100.8	100.9	100.5
	2005	101.2	101.5	101.6	101.6	101.6	101.6

Note: Indexes for the most recent six months shown are subject to revision.

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are "must take" respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum_i w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

CANADIAN Observer ECONOMIC

Statistics Canada's **Canadian Economic Observer (CEO)** delivers the most thorough, monthly economic briefing available. Each month as a subscriber you receive current and reliable information to help you stay abreast of the economic performance of the country, your province and the specific economic sectors in which you're interested.

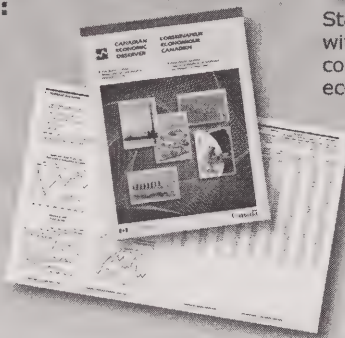

CEO is presented in two parts:

CEO—The Magazine

- Sector-by-sector analysis of economic indicators
- Developments in provincial and international economies
- Highlights of economic events in Canada and around the world
- A summary table of current economic conditions
- Feature articles spotlighting major issues and industry sectors

CEO—The Statistical Summary

- Detailed figures in tabular form on markets, prices, industrial sectors, international and domestic trade, and much more
- More than 1,100 economic indicators covering: market sectors, imports, exports, demographics, unemployment, and much more
- User-friendly tables and graphs

What's in a typical issue?

Statistical charts and tables are blended with expert commentary to provide a quick, concise, wide-ranging overview of the economy.

NEW — CEO now available in an electronic format!

Enjoy the complete print edition in an electronic format (PDF) for 25% less than the cost of the print version. Subscribing to the electronic format also gives you access to our archives of articles. Visit our website at www.statcan.ca to download it today!

Your annual subscription to the CEO print version includes:

- **12 issues of Canadian Economic Observer**, your source for the latest trends, analyses and data on Canada's economy.
- **A FREE edition of CEO's Annual Historical Supplement**—a fact-filled compendium, putting at your fingertips the economic trends that have characterized Canada's development from as far back as 1926 right up to the present... all in one easy-to-use volume.

Subscribe to the Canadian Economic Observer

Canadian Economic Observer (Cat. No. 11-010-XPB)

Order 1 year subscription: \$243.00

Order 2 year subscription: \$388.80 **Save 20%**

Order 3 year subscription: \$510.30 **Save 30%**

In Canada, please add **either** GST and applicable PST **or** HST. Print version: no shipping charges for delivery in Canada. For shipments to the United States, please add \$6 per issue or item ordered. For shipments to other countries, please add \$10 per issue or item ordered. (Federal government clients must indicate their IS Organization Code and IS Reference Code on all orders.)

SERVICES INDICATORS

For and About Businesses Serving the Business of Canada ...

At last, current data and expert analysis on this VITAL sector in one publication!

The services sector now dominates the industrial economies of the world.

Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information ... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, *Services Indicators* brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing timely updates on performance and developments in:

• *Communications*

• *Finance, Insurance and Real Estate*

• *Business Services*

Services Indicators brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and

liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, *Services Indicators* gives you the complete picture **for the first time!**

Finally, anyone with a vested interest in the services economy can go to *Services Indicators* for **current** information on these industries ... both at-a-glance and in more detail than has ever been available before – all in one unique publication.

If **your** business is serving business in Canada, or if you are involved in financing, supplying, assessing or

actually using these services, *Services Indicators* is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Services Indicators (catalogue no. 63-016-XPB) is \$125. In Canada, please add **either** GST and applicable PST **or** HST. Shipping charges: No shipping charges for delivery in Canada. For shipments to the United States, please add \$24. For shipments to other countries, please add \$40.

To order, write to Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, Canada, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to **1 877 287-4369** or **(613) 951-1584** or call **1 800 267-6677** toll-free in Canada and the United States and charge to your VISA, MasterCard or American Express. Via e-mail: order@statcan.ca. Visit our Web Site at www.statcan.ca.
